

MEMORANDUM

DATE: June 6, 1983

TO: Warner K. Reeser

FROM: Glen Lane *GL*

cc: John Blueyes
Gary Parker

SUBJECT: T.A. 38-675, Jackpile-Paguate Reclamation Plan: Comments on
ANL Evaluation of Radiological Impacts (ANL/ES-131)

Confidential Claim Retracted

Authorized by: *SL*

Date: *9/12/13*

A review of the subject document has resulted in concurrence with the very thorough ANL analysis of the atmospheric pathways which predicts that the airborne concentrations of all the pertinent radionuclides are less than the current regulatory limits for all five decommissioning alternatives.

However, the final evaluation of hydrologic pathways should await the, as yet, uncompleted groundwater modeling analysis to be performed for the EIS, presumably by the BLM (the former MMS group).
